

Summer Art Programs

smART Explorers is Houston's premiere hands-on art program for kids! We bring the art class to you. Students will experience a hands-on art lesson, with fun projects right in their very own classroom. All supplies are included in this 30-45 minute, fast paced and fun art experience.

Our Summer Programs are designed for ages 4 and up. Toddler art programs are available for ages 2-4.

Price for this art experience is \$4.25 per student (minimum applies) and includes all art supplies, set up and clean up, a trained artist, and a framed take home masterpiece for each child.

Reservations are required, call 281.445.ARTS (2787) today!

Combining the Passion of Art with the Power of Imagination

smART Explorers delivers quality art education and enrichment programs that explore a participant's natural curiosity about art and helps develop and strengthen creative skills, build self-esteem and the confidence to try something new.

Our programs foster a love for art. smART Explorers programs help educators and program directors by offering art experiences that are aligned with national and state standards for art and include all the necessary supplies to stimulate imagination and encourage a child's self-expression.

Wacky Watercolors

Join us as we learn to use different techniques of water coloring to make a wacky watercolor gallery. We will make deep/light painting, a wash and wiggle painting, an oil pastel resist painting, and to complete our gallery, a salty sprinkle painting!

Recycle Art

We will become recyclers as we use recycled items to make unique art projects. We will make a sculpture from packing peanuts, make recycled rainbows, and even make recycled art we can wear!

Faces of Picasso

Become a mini Picasso, as we find out why Picasso is a master of the arts. We will recreate his works with the technique of cubism as we use bold oil pastels to make an abstract self-portrait!

Moments With Monet

Let's have some moments with Monet, as we learn some fun facts about this master painter. We will paint beautiful flowers in a vase, and make a recreation of Monet's favorite subject, water lilies!

Imagine That

Learn all about art through imagination as we journey through the many inventions and art works of Leonardo Da Vinci. We will make wishing sticks and our creativity as we bring our own inventions to life!

Modern Marvels

We will create modern art using the amazing techniques made famous modern artists. We will make a cubist collage, a Warhol print, explore bold lines and color in this exciting program.

Abstraction Attraction

Students will use Russian artist Kandinsky's methods of contrasting colors and geometric shapes. We will learn how to use color to express emotions as we make bold bold colorful abstract masterpieces!

Toddler Programs

smART Explorers nurtures budding young artists with our incredible programs magnificently designed for Toddlers. These 30 minute programs are appropriate, safe, stimulating and FUN!

Exploration Station

Join us as we explore the world of new art products. In Exploration Station, our littlest artist will use the newest "state of the art" art products to create mighty masterpieces!

Wonderfully Wild

Join us as we go wonderfully wild! Using dramatic puppet play, we will take an adventure through the world of Maurice Sendak's classic book "Where the Wild things Are", make our own monster mask and use our creativity to paint creatures from the book!

Adopt An Animal

Our little artists will learn about chromatography as we make beautiful butterflies. Then we will explore nature's habitats using our imagination to create our very own animals and the habitats they live in!
